Assistant Commissioner for Patents
Box Patent Application
Washington, D.C. 20231

Dear Assistant Commissioner for Patents:

This correspondence concerns US national application 09/530,303 filed 27 APR 2000 by applicant inventor Christopher King and entitled, "Automated Hair Isolation and Processing System." Art Unit: 3732 Examiner: Todd E. Manahan.

Applicant intends this correspondence as a statement that the substitute specification contains no "new matter," as required for a filing under 37 CFR 1.125(b). Applicant has included a marked-up copy showing the amendments to be made via the substitute specification relative to the originally-filed specification. The marked-up copy shows deletions as lined out and insertions as underlined. The marked-up copy also includes an appendix of added sections of text too long to be placed within the body of the marked-up copy. Finally, the applicant has included a clean copy of the substitute specification as amended.

The applicant's substitute specification includes additional "subject matter" not of record as of the specification's 27 APR 2000 filing. However, **the applicant certifies that the substitute specification contains no "new matter."** In other words, applicant's editing changes do not change the scope of his invention as it was originally filed 27 APR 2000.

Sincerely,

Christopher R. King
Inventor/Applicant

Assistant Commissioner for Patents
Box Patent Application
Washington, D.C. 20231

Dear Assistant Commissioner for Patents:

This correspondence concerns US national application 09/530,303 filed 27 APR 2000 by applicant inventor Christopher King and entitled, "Automated Hair Isolation and Processing System." Art Unit: 3732 Examiner: Todd E. Manahan.

Applicant intends this correspondence as a separate letter to the Draftsman in accordance with MPEP 608.02(r). Applicant has included a copy of all 90 drawing pages as originally filed showing proposed changes in red ink.

The Draftsman should note that the abbreviation R.S. with an arrow pointing to areas of solid black shading indicates Redo Shading so that it is not solid black. Applicant intends to change all reference-character indicative lead lines that are composed of dashes into continuous lines, even if not shown in red ink.

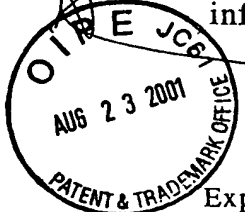

Applicant asks for the Draftsman's response as to the acceptability of the proposed drawing changes.

Sincerely,
Christopher King

30 MAY 2000

Assistant Commissioner for Patents
Box PCT
Washington, D.C. 20231

Dear Assistant Commissioner for Patents:

This correspondence concerns PCT/US98/23055 as entered into the US national phase. This correspondence and documents enclosed with it and listed below do not apply to the international portion of this application which remains before the IPEA. It contains the following:

1. Amendments to the claims of a US national patent application as filed under 35 U.S.C. 371 with the United States Designated/Elected Office (DO/EO/US)
(5 pages)

[Where originally there were 17 claims and after amendments consisting of canceling all 17 original claims and adding 17 new claims there are 17 claims]:

"Claims 1 to 17 as originally filed canceled; new claims 1 to 17 added"

No payment has been made since these amendments have not increased the number of claims valid at entry into the national phase.

Sincerely,
Christopher King
